MID TERM EXAMINATIONS – November 2024					
Programme	:	<b>B.Tech.</b>	Semester	:	<b>Interim 2024-25</b>
Course Title/ Course Code	:	<b>Theory of Computation and Compiler Design/ CSE2004</b>	Slot	:	<b>C11+C12+C13</b>
Time	:	<b>1 ½ hours</b>	Max. Marks	:	<b>50</b>
Answer all the Questions					
Q. No.	Question Description				Marks
1	(a) Design a DFA to accept $L = \text{set of all strings } w \text{ over alphabet } \{0, 1\}$ such that numbers of 1's in $w$ is $3 \bmod 4$ .				5
	(b) Build a NFA without $\epsilon$ -moves equivalent to the following $\epsilon$ -NFA. 				5
2	(a) Construct the DFA equivalent for the following regular expression: $1^*00^* + 010$				5
	(b) A Lex program is given below –  Regular Definitions None Transition Rules 1    { } /* actions are omitted here */ 100 { } $1^*0^+$ { } Implement the Lex as DFA.				5
3	Consider the following grammar: $S \rightarrow 0B \mid 1A,$ $A \rightarrow 0 \mid 0S \mid 1AA,$ $B \rightarrow 1 \mid 1S \mid 0BB$ For the string 00110101, illustrate (i) the Left-Most Derivation (LMD), (ii) the Right-Most Derivation (RMD), and (iii) the Derivation Tree. Also prove that the given grammar is ambiguous.				10
4	(a) Build the grammar $G'$ in Chomsky Normal Form (CNF) equivalent to the following grammar $G$ : $S \rightarrow bA \mid aB,$ $A \rightarrow bAA \mid aS \mid a,$ $B \rightarrow aBB \mid bS \mid b$				5
	(b) Construct a PDA accepting $\{a^n b^m c^n \mid n, m \geq 1\}$ by null store.				5
5	(a) Determine the grammar without left recursion equivalent to the following				5

	grammar: $X \rightarrow X+Y \mid X-Y \mid Y$ $Y \rightarrow Y*Z \mid Y/Z \mid Z$ $Z \rightarrow (X) \mid a$	
	<b>(b)</b> Do left factoring for the following grammar: $S \rightarrow AS \mid AbS \mid A \mid a$ $A \rightarrow aB \mid aBS \mid a$ $B \rightarrow bA \mid b$	<b>5</b>
$\Leftrightarrow \Leftrightarrow \Leftrightarrow$
